

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

THE NEED OF PRACTICAL COOPERATION OF EDUCATIONAL AND OF MEDICAL DEPARTMENTS IN MODERN UNIVERSITIES

THE object of this paper is, first, to show the present status of affiliation of schools or departments engaged respectively in the training of physicians and of teachers, and secondly, to present a plea for a more general and effective cooperation between medical and educational departments where the interchange is warranted by technical training and material resources in both departments. Herein we are concerned particularly with the training of teachers pursuing at least a four years' course in a good college or university department of education and also, on the medical side, with the supplementing of the training of prospective physicians who intend to participate in the work of the schools.

Our general topic suggests the whole field of modern sanitation as it concerns not only the teacher and the medical inspector, but also the engineer, economist, etc., a field into which more than one of our universities have entered. We shall consider only hygiene and related topics as mainly affecting the teacher, superintendent, principal and the medical inspector, school nurse and assistants.

The actual status of the affiliation between medical and pedagogical departments of universities in the United States is revealed in the results of inquiry instituted by the writer in March, 1912. A circular of inquiry, including stamped return envelope, sent through the Newcomb School of Education, was mailed to the deans re-
